Installing MySQL on mac

1. Download the disk image (.dmg)
2. Double click on it to install
3. Configuration → use legacy password encryption
4. set pwd → admin@2023

Setting path of MySQL on mac

open terminal

```
ls -a
open -t .bash_profile
```

```
export = ${PATH}:/usr/local/mysql-8.0.32-macos13-arm64/bin
```

Save it

You can search /usr from Spotlight search

---

sudo nano /etc/paths

Add this line to the file and save

/usr/local/mysql-8.0.32-macos13-arm64/bin

close terminal and restart terminal

mysql -u root -p
